Week in Review

Welcome to Session 2 Campers!! Its hard to believe that Session 1 is already over; time really flies when you're having fun. The second half of the summer is sure to be just as fun as the first. In the second session of camp the focus is learning how to become a better Eco-Citizen. In the next four weeks, campers will learn about sustainable energy, foods, recycling, and so much more. This week we got off to a good start as guest speakers from the Broward County Recycling Program came to visit. All the campers had a great time learning how to Reduce, Reuse, and Recycle. Another highlight this week came from the beautiful ocean. The seas where as flat as a pancake which provided for crystal clear water and hours of play time. Thanks for a great week campers!!

Weekly Highlights:

- Broward Recycling Guest Speakers
- Beautiful Blue Seas
- Fun Science

Busy Little Squirrels

The Squirrels where very busy this week with all the different activities. In sports, three soccer stars emerged; David G., Luz R., and Logan C. mesmerized campers and counselors alike with there fancy footwork. In Science, the group mined for "coal" using chocolate chip cookies, and learned how scientist drill for oil. This project showed campers how difficult these tasks really are. In Art, Mr. Tommy the art counselor taught the Squirrels how to make colorful flower pots; the group even got to plant a few seeds in the pots to start their own garden. Ms. Kristina, the head counselor, even got artsy when she taught the group how to make necklaces with only yarn and bottle caps. With all these projects and games going on this week, how could a Squirrel not have fun?!

Rascally Raccoons

The Raccoons had a marvelous time this week! This groups favorite activity during the week was Science with Ms. Megan the science counselor. The Raccoons conducted several experiments about energy. One experiment had them creating crystals out of charcoal, while other experiments involved using the sun's energy. They even got to make paper airplanes to show the difference between potential energy and kinetic energy. You could almost feel the brain power being generated. The Raccoons also enjoyed the beach this week as the ocean was nice and calm. Billy M. almost made himself disappear in the sand when he dug a hole and buried himself! The most valuable lesson this group learned this week came from the Broward Recycling guest speakers. The campers learned about the three R's and how they can help the environment. Good job Raccoons!!

Delightful Dolphins

The Dolphins had a great first week of session 2. The group participated in many different sports and games during the week. Most notable was the pirate game organized by Ms. Celia, their head counselor. What made this game so fun was the fact that it was raining while the Dolphins were playing it! The group splished and splashed in the cooling rain and had a stupendous time doing it. The most memorable thing the group learned this week came from, like most of the groups, our guest speakers from the Broward Recycling Program. The group learned how important recycling is in Broward Co. and how using waste products can actually give us electricity! Very interesting indeed. We look forward to seeing you next week Dolphins!

Super Sharks

The Sharks were very active this week. From swimming and surfing at the beach to playing games in sports to learning interesting things in art and science, the group really gave it their all. In science the group learned about energy and how people go about getting it. They learned how scientist drill for oil and mine coal; while the group also were educated on alternate and sustainable types of energy like solar and wind power. You can already begin to see some young scientist in this group. Most notably, the group learned about recycling and how everyone must do their part to help the environment. Every little bit counts Sharks!! Seeya next week!

Happy Birthday to...

Josh C. * Loren G. * Charlie G. * Skyler N. * Austin S.
Ethan S. * Adrienne S. * Nicholas W.

Important Reminders!

- **Camp Lunches:** We now have Online Ordering for Camp Lunches! All orders will now need to be placed and paid for online. Please visit www.campliveoakfl.com and click on Register Online for more information. All lunch orders are due by Saturday at 5pm for the following week, so order your Yummy Lunches today!
- **Field Trip:** Next week we will be visiting the Miami Science Museum! On Thursday, July 22nd the camp will head south to the Miami Science Museum to check out all the cool exhibits they have. This year the museum is featuring several exhibits concerning energy and how we put it to use; it's going to be a great time! Remember all campers must wear their camp T-shirt on the trip and bring a normal camp lunch. If your camper orders a lunch from Yummy, they will receive it like normal. Reminders will be sent out next with more details. Thanks.
